

BENCH TOOL ARM

Description

The Bench Tool Arm is designed for light duty applications mounted on benches or work tables where overhead railing is not possible. Useful for holding hand, power and/or pneumatic tools.

It is equipped as standard with the CORMAC R-090 aluminum rail. It provides order and safety to the work station, as well as ensuring the availability of tools on a limited work surface. The suspension system provides smooth movement and ergonomic postures for the user.

***Table not included**
