

EZ FLOAT HANDLE

Description

Accessory for air balancers, designed for lifting and positioning loads, replaces the use of the handle away from the load. Provides the operator with the sensation of floating, which allows him to have greater control of the suspended load.

Specifications

- **Model:** EZFE0101
- **Capacity:** 250 Kg. load.
- **Total weight:** 4.2 kg.
- **Construction:** steel
- **Load handling:** variable weight
